BIBLIOGRAPHY OF SOVIET LITERATURE & GOSTs ON SOVIET RDA PROCESS

Prepared for:
Foreign Science Technology Center (FSTC)
Charlottesville, Virginia

Prepared by:
PRESEARCH INCORPORATED
8500 Executive Park Ave.
Fairfax, Virginia 22031

ADDENDUM

This bibliography was prepared as an interim report from a contract with Presearch, Inc., Fairfax, VA. It is under review and revision by the Study Advisory Group (SAG), but a copy is furnished to members of the SPAR Working Group as a courtesy. Two comments are appropriate:

a. Some GOST have been initially translated. None of the translations will be released until a significant number have been translated and all have been reviewed to assure consistent rendition of translation.

b. The resources represented by this effort are committed primarily to the benefit of an organized AMC effort, with emphasis on intelligence analysis needs of AFMIC and CRDC, whose funds are being expended for this contract. Access to libraries and computer indices should be coordinated with the SAG Chairman, George Kane, FSTC, Autovon 274-7583.

PROJECT ASAP:
CURRENT BIBLIOGRAPHY ON THE RDA PROCESS

PREFACE

Project ASAP (Automated Support to Analytical Processes) is being performed for the U.S. Army by Presearch Incorporated under Contract No. DAAD5-C-84-0189. The three main objectives of the study effort are:

1. Research, analyze, and systematize Soviet research, development, and acquisition (RDA) processes in key Soviet industries, using original Soviet sources. Develop conceptual and timeline models of the Soviet RDA processes. Prepare a definitive bibliography of Soviet S&T publications dealing with the development, management, and organization of RDA programs and prepare a list of the Soviet State Standards Publications (Gosudarstvennye Standardy or GOSTs) directly relevant to RDA programs.
2. Review and apply the Invisible College (IC) Method to CIRC bibliographic data that reflects the activities of selected Soviet research institutes. Assess IC Method and suggest possible improvements and enhancement of the method.
3. Assess feasibility of improving and automating the IC Method and make recommendations.

This document is the third in the series of interim publications updating and improving the bibliography being used in the study of the Soviet RDA process. Both the literature and GOST bibliographies are bound together in this volume. This document reflects the status of the bibliography as of 15 April 1985.

The two bibliographies have been automated using Professional Bibliographic System (PBS) software and are being maintained on Presearch microcomputers. The Presearch study team continues to acquire additional documents for inclusion in the list. The hard-copy documents listed in the bibliography are physically available at Presearch. For comments, additional information, and for additional copies of the bibliographies please contact Frank M. Murphy [(703) 876-6567] or Dimitry N. Ivanoff [(703) 876-6607].
